AMSEL-SE-IS-SDW-E-I

MEMORANDUM FOR TRANSPROC USERS

SUBJECT: Software Version Description (SVD) for Installation Support Module (ISM) Military Personnel Transition Processing (TRANSPROC) Interim Change Package (ICP) P5B-A26-10-02-A

- 1. Enclosed is ICP P5B-A26-10-02-A which provides a formal change to the Military Personnel Transition Processing (TRANSPROC) ISM.
- 2. Acknowledgement of installation of this ICP must be made IAW instructions provided in Enclosure 1.
- 3. This memorandum certifies that the ISM subject software has been thoroughly tested, is considered to be a quality product, and is hereby authorized for release to a production environment.
- 4. Security Implications: NONE.

### 1. Scope.

1.1 Identification. This Software Version Description (SVD) applies to the Military Personnel Transition Processing (TRANSPROC) running on Army Standard Information Management System (ASIMS) and networked AIX operating system on UNIX platforms.

1.2 System Overview. TRANSPROC is part of the ISM Project which is an Army-wide Major Automated Information System (MAIS) initiative. The primary objective of ISM is to enhance, through automation, installation management functions. ISM applications consist of standard procedures packaged into functional applications which automate as well as integrate day-to-day installation processes. ISM applications use the Installation Level Integrated Data Base (ILIDB), which is the central repository for data that is common to more than one ISM application, and various local databases that contain data elements unique to the individual ISM applications.

The purpose of the TRANSPROC ISM is to support the personnel portion of demobilization and may be utilized to perform the peacetime (garrison) Military Personnel (MILPER) functions supporting Separation Processing, (Transition and Retirement), Documents, Orders, SIDPERS Transaction and Reports. It facilitates the preparation and administrative handling of records, forms, memos and orders; required forms have been automated. These administrative files are maintained on the Installation Level Integrated Data Base (ILIDB) or the application's local data base. Printed copies of DD Form 214, DA Form 664, separation memos and orders are produced as output.

- 1.3 Document Overview. This document provides the instructions necessary for the implementation of the formal Interim Change Package (ICP) P5B-A26-10-02-A of TRANSPROC. It informs the users of the changes made to the system and provides Point of Contacts (POCs) to be contacted in case of problems.

3.6 Installation Instructions. These instructions explain how to install TRANSPROC ICP P5B-A26-10-02-A onto the host computer

at the installations.

Pre-Install Procedure. Before beginning to install TRANSPROC ICP P5B-A26-10-02-A onto the ISM host computer, follow this procedure to make sure you have the information you will need when installing.

STEP 1. Verify Oracle. The Oracle RDBMS must reside on the host and be on-line.

IMPORTANT: This ICP is being tested in conjunction with ICP P5B-A26-07-03-S on "hunts5". This ICP must be installed after P5B-A26-07-03-S for everything to work correctly.

Install Procedure. This procedure installs ICP P5B-A26-10-02-A for TRANSPROC R10.02 AIX version 4.2 operating system baseline onto the installation server. This portion of TRANSPROC R10.02 must be installed on each server at the installation.

- STEP 1. Login with the login name of "root".
- STEP 2. Select a drive on the system that contains at least 300 meg of available disk space. Change directory to that drive. Make a directory called "ICP. 1002". Place the following files for ICP 1002 in the directory ICP. 1002.

transprc\_1002. cpi o. Z 7197749 17 Aug 1998 install\_transprc\_1002 2890 18 Aug 1998 README. transprc\_1002 3048 17 Aug 1998

STEP 3. Change directory to ICP. 1002 and type:

chmod 777 install\_transprc\_1002 <Enter>
./install\_transprc\_1002 <Enter>

3

Change Package Control Number: P5B-A26-10-02-A

- STEP 4. The install\_transprc\_1002 will complete the following:
  - a. uncompress and uncpio the transprc\_1002.cpio.Z file.
  - b. change the ownership of and copy the files in this ICP into the home directory of user "transprc".
  - c. record all output from each of the steps performed in a file named "transprc\_1002.log" located in the ICP. 1002 directory.
- STEP 5. Results of the installation in transprc\_1002.log should be reviewed.
- 3.6.1 Installation Effective Date. This ICP should be immediately implemented upon receipt or NLT 30 days from date of receipt.
- 3.6.2 Security Implications. This paragraph has been tailored out.

3.6.3 ANSOC Installation Instructions. All users receive the same baseline with change package number through e-mail and Status Tracking and Reporting System (STARS) Bulletin Board System (BBS). This change package contains the following file:

Quantity File ID

System

Change Package No.

1 transprc\_1002. cpi o. Z i nstal l\_transprc\_1002 README. transprc\_1002 AIX 0S 4.2

P5B-A26-10-02-A

Ensure that all master file backups have been completed prior to loading this package.

Use these load instructions to develop load procedures that work best for your installation.

Due to various user configurations, each installation must determine appropriate block-size and library allocations.

Users must not, repeat, must not, make changes to the files.

Security impact: None.

- 3.6.4 Special Installation Instructions All Users. None.
- 3.6.5 Point of Contact. If there are any problems or questions with the installation, or any shortage to the contents of this package, call the Army Network and Systems Operator Center (ANSOC), Ft. Huachuca: DSN 879-6798/6858 or 1-800-305-3036.

4

Change Package Control Number: P5B-A26-10-02-A

- 3.6.6 Report of Implementation. Implementation of this change package must be reported by completing the change package implementation form. This report must be sent to Ft. Huachuca using Fax or mail.
- 3.7 Possible Problems and Known Errors. This paragraph has been tailored out.
- 4. Notes.
- 4.1 Notes. This paragraph has been tailored out.
